## What changes would you suggest to improve the curriculum?

27 responses

Impart Application based curriculum more and more

Some of the courses need to be changed as they are irrelevant to the subject

Study curricula from leading institutions locally and globally. Include industry partners in the board of studies.

Infrastructure needs improvisation

Instead of semester system,back to yearly system

I respectfully suggest the inclusion of workshops and hands on training programmes for the different courses offered by the Department of Electronics.

Nil

Laboratories should be upgraded as per the new curriculum, there isn't sufficient space and required equipments to carry out the practical work. Frequent trainings and workshops for students shall be included.

More than 3 months should be given per semester for effective teaching

Introduce more skill-based courses and practical components to align the curriculum with industry and societal needs.

Incorporate case studies, debates, and real-world problem-solving exercises

1. Redundancy of topics should be removed
2. Scope of curriculum should be well defined.

Attendance of students should be made a priority

Shift from classical to applied courses.

Because of harsh weather conditions, yearly system may prove more beneficial than semester system

Timelines should be framed and properly followed for achieving targets set in academic calendar.

Attendance in VAC where number of students is more than 130 per class shouldn't be mandatory exercise.

Curriculum must be skill and market oriented

1. Our curriculum is archaic. It needs to be aligned with current revolutions of AI and applied sciences.
2. We need to come out of subject specificity and focus more on interdisciplinary approach. For example Chemistry, Clinical Biochem and CS depts can collaborate and develop a course on Modern Lab testing using AI.
3. We need to lay emphasis on practical components over theoretical ones. Because we don't just need more and more degree holders, we need more skilled hands. Skilled hand doesn't mean only in sciences, but in humanities as well. Good writers, good reporters on ground, Film makers, poets, Environmental and Chemical analysts, Pharmacists, Technicians rather than a person with 90 percent BSc/BA with no skill. That will only increase the burden of unemployment!
4. A component in the syllabus on "stereotyping of jobs" would be a boon. Youth need to know that no job is odd, or no job is elite. All jobs are equally important to run the world. A doctor needs a carpenter, a professor needs a tailor. This will allow students to think of adopting a career that best suits their aptitude without hesitation.

Each Semester should get requisite hours of teaching before commencement of exams for effective teaching and completion of syllabus

Nothing as of now

Shift to applied part

It must be practical oriented.

Curriculum should be more industry/market oriented.

Upgradation of labs

Syllabus as per current needs and changing trends

1. Introduce changes to align the curriculum more with industrial needs.

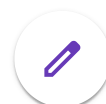

To empower the student with self learning through effective web content and this will lead to better teaching learning experience for both learners and teachers

Cluster of semesters fall in same bracket, and handling so much load and teaching output gets effected

1. Syllabus prescribed is not in tune with NET/SLET & other competitive exam
2. course outcomes just remain inscribed on syllabus copy nothing substantial is done regarding realising the actual purpose of course outcomes
3. Time is too short to complete the prescribed syllabus
4. We strive to find relevance of courses with the market, in most of the instances it can't happen, introduce marketable technical courses in colleges alongwith conventional subjects

### How well did the curriculum prepare you for your professional career?

 Copy

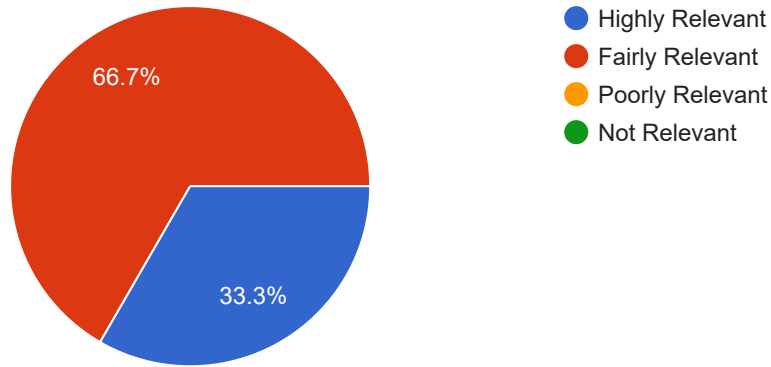

15 responses

How relevant was the curriculum to industry trends or higher education goals?

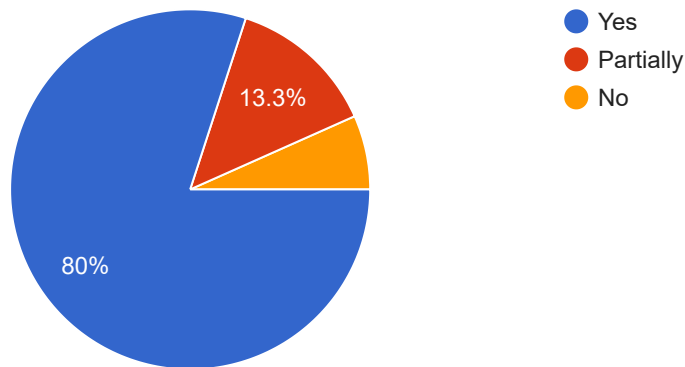

15 responses

Were the skills and knowledge imparted through the curriculum applicable to your professional field?

15 responses

Do you think there is a need to include new subjects or courses? If yes, please suggest.

12 responses

YES PG COURSES IN THE ALREADY EXISTING CURRICULUM

No, New subjects have already been included..

Skill enhancement courses which vl give exposure to students

Practical knowledge at skills rather than just theory

Ofcourse there is a need to include new courses as per the need of time but at the same time the courses we already have/had should be given importance in terms of opting for subjects in major basket.

Integrated courses

Perhaps not..

Yes

yes, Digital marketing, animation, interior designing

Yes, Deptt of English should introduce Masters program in the College.

UG course in Public Administration

No

What additional skills or competencies should be included in the curriculum to meet current professional demands?

12 responses

#### MORE TECHNOLOGICAL INTERVENTIONS

Teamwork and Creativity

Better communication skills vl add to the confidence of students Student also needs to be given social skills which vl teach them to deal with different situations in life

1. Regular counselling sessions shall be held to mentally prepare the students for future career opportunities nationally and internationally so that they remain focused and word hard to achieve the right goals.
2. Hands on training for longer periods shall be provided to science students in Biotechnology labs or relevant so that they gain the real practical experience of the techniques that are being taught to them in theory.

Basics of Computers and various applications, Basics of Research, Personality Management, Skill Enhancement, Business exposure.

I strongly suggest that the communication, being compassionate and problem solving skills should be inculcated among students.

To effectively meet current professional demands, the curriculum should encompass "Entrepreneurial Skills" ~ comprising Basics of starting & managing a small business, marketing, customer service, business planning etc.

Rich lab facilities

Time management skills, leadership development, computer literacy skills

Language lab in the College is dysfunctional. Soft Skill courses can be upgraded by having Language lab in the College.

Electoral/Legal Literacy

Courses should be more practical than theoretical
